Subject: Submission of Proposal on “**VerifiAI , Unified AI-Generated Content Detector**”

Dear Sir,

We hope this message finds you well. We, the undersigned students of the Dcom program at Rapti Engineering College, are writing to seek your approval and support for our proposed final year project: the development of a **Multi-modal AI-generated content detection web application**.

Our team comprises three enthusiastic students who are eager to apply our technical knowledge and creativity to a real-world project. With the rapid rise of AI-generated content across platforms, we aim to build a web application that can detect whether text, images, videos, or files are created by artificial intelligence or by humans.

This project will not only help us enhance our skills in frontend and backend web development, API integration, and database management, but will also strengthen our abilities in teamwork, communication, and project planning.

We believe this solution has real-world relevance and the potential to benefit both educational and professional environments by promoting content authenticity.

We kindly request a meeting at your earliest convenience to present our proposal in more detail and discuss your valuable feedback. Your mentorship and guidance would be instrumental in the successful execution of this project.

Thank you for your time and consideration. We look forward to your support and the opportunity to work under your supervision.

Sincerely,

Santosh Poudel

Yamuna Oli

Devraj Kunwar

Nabin Chaudhary
